

Press Release

iMeetingX 2 - Getting Things Done for Business - is available!

Steyregg, Austria - 19th February 2018

Techno-Grafik, the manufacturer of iTaskX, is delighted to announce its brand-new iMeetingX 2 upgrade.

Good meetings result in defined tasks, defined tasks need meetings to follow-up. In a business environment, it's also essential to track decisions, create and distribute meeting invitations, reminders and minutes. To meet all these business requirements in iMeetingX 2, we have expanded the easy to use Getting Things Done task management tools with advanced meeting organization and automatic meeting minutes management options.

What's new in iMeetingX 2?

- **Redesigned task list**
The task list in iMeetingX 2 has been completely rebuilt from the ground up – with a clear structure and powerful new features.
- **Assign tasks to your agenda items**
With this great feature, tasks can be grouped by entry type or by agenda item in the meeting minutes option.
- **Assign unlimited attachments to each task**
Task attachments in iMeetingX 2 allows relevant files to be stored in a specified place and offers additional task information. iMeetingX can also automatically add files to your meeting minutes when sent by email.
- **Improved report customization**
Customizing the appearance of invitations, meeting minutes and lists is now easier than ever. The appearance settings, such as header, footer, colors, fonts, etc. need only to be set once via the initiate option. And best of all, this can be achieved by simply ticking boxes.
- **iMeetingX 2 is now available for Windows and Mac**
After purchasing a license from our online store, the platform-specific application can be simply downloaded: the same license file will activate iMeetingX. You can also switch between platforms at any time without incurring extra costs.
Note, iMeetingX purchased from an App Store is platform-specific and cannot be used on multiple platforms!
- **New smart lists**
Smart lists are a true productivity booster. They provide a more thorough overview of how tasks are viewed, managed and completed. A smart list essentially allows tasks to be monitored, filtered and viewed by nearly any set of identified task attributes. iMeetingX already comes with a set of pre-defined smart lists, but new lists can be created as required.

- **Microsoft Outlook support**
With iMeetingX 2, meeting invitations and minutes can be sent using Microsoft Outlook on Mac and Windows.
- **Integrated task change-log**
The new change-log in iMeetingX 2 shows all changes that have been made to a task in your project.
- **CSV file export**
With the new CSV file export, files can be easily exchanged with many other applications, such as iTaskX, Excel, FileMaker, Numbers, etc.
- **Customizable application language**
With iMeetingX, the application language can be selected, and is independent of the operating system language.

System Requirements for Mac

Mac OS X 10.11 El Capitan, macOS 10.12 Sierra or macOS 10.13 High Sierra.
